

Module 9 – Lesson 4

Assignment: Set up your Yoast SEO plugin

- 1.) Re-watch the Yoast SEO plugin video lesson.
- 2.) Follow along and use the long configuration method (not the wizard) to set up the Yoast SEO plugin for your site. If there is something you don't understand, use the Googles and find out what you are to do and why? You don't have to have an in-depth knowledge of all of these items but you need to understand what you are doing and the reasons you would or would not need to do them.
